

## Label Change Communication

AROTEC DIAGNOSTICS have recently released a new label template for our products. These changes were implemented to meet our customers' expectations while improving the information available on our vials.

The new label layout and information has been designed to assist our customers with the inbound receipt of AROTEC products. This includes the addition of 2-D data matrix barcodes and clearer identification of product lot information, which should offer a more convenient way of transferring information from our vials into our customer's inventory and storage systems.

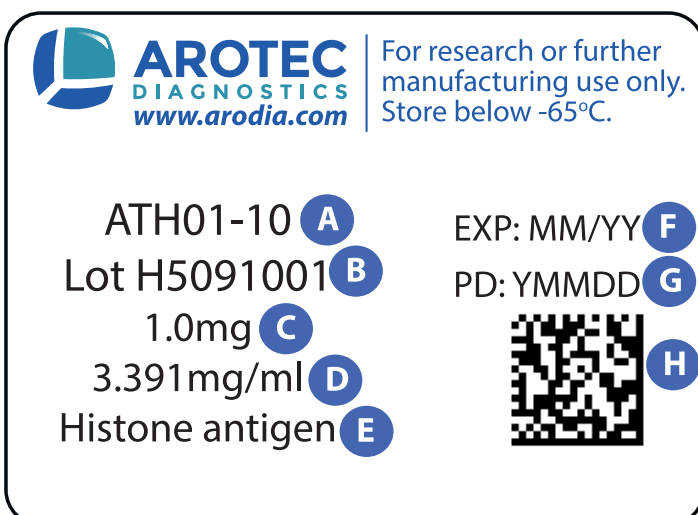

We are now also stating the expiry date on any new antigen lots. This will be printed on each vial as well as on our certificates of analysis.

Please see below for more information regarding the layout changes to our labels.

If you have any questions or require clarification on any point above, please do not hesitate to contact your local sales representative.

Kind Regards,

Matt Reynolds - QA Manager

- A** Product Code
  - B** Lot Number
  - C** Content Quantity
  - D** Concentration
  - E** Product Name
  - F** Expiry Date
  - G** Packaging Date
  - H** Data Matrix barcode
- Barcode Information:
- Product Code
  - Lot Number
  - Concentration
  - Expiry Date
